VENUE & DATE:
Boston University, Boston, US
June 24-25, 2013

ORGANIZERS:
Kate Fitzgerald, Gabriel Nunez and Abcam

KEYNOTE SPEAKER:
Vishva Dixit

OVERVIEW:
This two-day conference will bring together international scientists and clinicians working on the inflammasome today. Topics will range from an overview of the molecular mechanisms of inflammasome activation; the roles of IL-1, IL-18 and pyroptosis in immune defenses, novel effectors of the inflammasome and studies of the role of the inflammasome in infectious and sterile inflammatory diseases.

This conference will comprise a compelling mix of scientists who span basic discovery to the clinic.

TOPICS:
• General mechanisms of activation
• Inflammasomes in infection
• Inflammasomes and sterile inflammation
• Metabolism-inflammasome link
