Poster Index

Poster 1  Bilge Argunhan
A genetic screen for isolating Drosophila metal metabolism mutants

Poster 2  Nadja Bamgartner
Preanalytical and analytical aspects of hepcidin quantification

Poster 3  Chun-Wu Chen
Metal Ion Dysregulation in Lysosomal Storage Diseases

Poster 4  Lucy Eddowes
Hepatitis C virus disrupts BMP/SMAD signalling suppressing hepcidin

Poster 5  Andrea Erhard
Studies on the membrane topology and functional hepcidin domains of human ferroportin

Poster 6  L Fernandez
Effects of increased iron intake during the neonatal period on the brain of adult APP/PS1 transgenic mice

Poster 7  Armin Finkenstedt
The role of sHJV, EPO and GDF15 as possible regulators of hepcidin expression during pregnancy

Poster 8  Veronica Fiorito
Role of Hemopexin in duodenal inorganic and heme iron absorption

Poster 9  Rohil Goutam
In vivo assembly of Drosophila ferritin

Poster 10  Amalya Hovhannisyan
Risk assessment of iron accumulation in the liver after prolonged starvation

Poster 11  Sana Hussain
Biomolecular interactions of proteins of iron metabolism

Poster 12  Konstantinos Mandilaras
Ferritin, a molecular link between iron metabolism and the circadian clock underlying Restless Legs Syndrome

Poster 13  Kamal Mansi
Thyroid hormone levels before and after haemodialysis (HD) in Jordanian patients with chronic renal failure (CRF)

Poster 14  Kosha Mehta
Identification of iron-related protein genes in CHO cells

Poster 15  Stanislav Ott
Investigating the role of iron in a Drosophila model of Alzheimer's Disease

Poster 16  Annalisa Pastore
The role of frataxin in iron-sulfur cluster formation

Poster 17  Dora Pereira
A novel oral iron therapy to address iron deficiency anaemia in inflammatory bowel disease
Poster 18  Charareh Pourzand  
*Light-activated caged-iron chelators for topical iron chelation therapy of skin cancer*

Poster 19  Roman Praschberger  
*Impact of a novel disease associated SLC40A1 mutation on the function*

Poster 20  Tina Radka  
*The UVA-induced labile iron release improves the efficiency of aminolevulinate-based photodynamic therapy of skin cells*

Poster 21  Animesh Raha  
*Ferroportin deficit is linked to pathological accumulation of Iron in Parkinson’s disease and ageing human brain*

Poster 22  Melanie Schranz  
*Secretion, proteolytic processing and nuclear targeting of Prohepcidin*

Poster 23  Regina Vontell  
*Ferric iron accumulation in cases of germinal matrix and intraventricular haemorrhage*

Poster 24  Kenneth White  
*Localisation of the Ferroxidase Hephaestin and its interaction with Transferrin*

Poster 25  Desley White  
*Iron and diabetes: Iron binding ability of glycated transferrin is reduced in vitro*
