**Poster Index:**

**Poster 1**  
Sarder Arifuzzaman  
Transcriptomic analysis reveals selective inhibition of EZH2 by a small molecule inhibitor attenuates inflammatory gene expression in microglia cells

**Poster 2**  
Alyson Ashe  
Investigations into the role of the putative histone methyltransferase, SET-32

**Poster 3**  
Chen Ee Sin  
System biology of anthracycline response reveals role of centromeric integrity in of chemotherapeutic resistance

**Poster 4**  
Eseul Baek  
Heterochromatin content and aggregation are regulated by the RDR1 gene in tobacco

**Poster 5**  
Isaia Barbieri  
Promoter-bound METTL3 maintains myeloid leukaemia by m6A-dependent translation control

**Poster 6**  
Samuel Beck  
CpG islands direct chromosomal architectures and modes of global gene regulation

**Poster 7**  
Michael Blank  
Emerging role of E3 ubiquitin ligase Smurf2 in cancer: epigenetic regulator and beyond

**Poster 8**  
Kyungjin Boo  
CD82/KAI1 maintains dormancy of long-term hematopoietic stem cells through interaction with DARC-expressing macrophage

**Poster 9**  
Yun-Cheol Chae  
G9a-mediated lysine methylation of FOXO1 attenuates its stability and induces cellular proliferation

**Poster 10**  
Andrew Ying-Fei Chang  
Recruitment of histone modifications to assist mRNA dosage maintenance after degeneration of cytosine DNA methylation in model animals

**Poster 11**  
Hana Cho  
Inhibition of aurora kinase A by alisertib negatively regulates MLL-AF9 acute myeloid leukemia, THP-1 cell proliferation

**Poster 12**  
Seongkyeong Choi  
Finding a key mediator of vitamin C demethylation effect

**Poster 13**  
Dongyoon Choi / Dabin Son  
Mouse JMJD4 is dispensable for embryogenesis

**Poster 14**  
Edward Chow  
Quantitative phenotypic optimization of epigenetic-based drug combination against drug resistant multiple myeloma
**Poster 15**
Chen Davidovich
The polycomb repressive complex 2 (PRC2) binds to RNA bearing short repeats of consecutive guanines: a new path for therapeutics to target PRC2-RNA interactions in diseases

**Poster 16**
Sho Goh
N6-methyldeoxyadenosine as a functional human epigenetic mark in non-transposable genomic regions

**Poster 17**
Namshik Han
Genomic positional conservation identifies topological anchor point (tap)RNAs linked to developmental loci

**Poster 18**
Seonghwi Hong
Epigenetic landscape during TWIST-driven EMT

**Poster 19**
Jae Hyun
Oxidative stress induces mislocalization of runt domain transcription factor 3 through histone deacetylase-mediated Src expression in HT-29 human colon cancer cells

**Poster 20**
Kwangbeom Hyun
Molecular mechanism of Bre1-Rad6 mediated H2B ubiquitylation

**Poster 21**
Suk Min Jang
A KAP1 phosphorylation switch required for heterochromatin DNA repair

**Poster 22**
Anshika Jangra
Improvement in the angiogenic potential of endothelial colony forming cells (ECFCs) from moyamoya disease (MMD) using panobinostat

**Poster 23**
Ah Jung Jeon
EZH2 inhibition leads to focal gain of PRC2 and retention of H3K27me3 across cancer cell lines

**Poster 24**
Sue Jin Moon
DBC1 promotes CDH2 expression by positively regulating DNA binding and stability of AR-V7 in castration-resistant prostate cancer

**Poster 25**
Li-Jung Juan
Characterization of the DNA methylation regulator N-a-acetyltransferase 10 Protein in DNA binding

**Poster 26**
Hyeonsoo Jung
G9a and LSD1 regulate transcription of olfactory receptor during leukemia cell differentiation

**Poster 27**
Jee Youn Kang
STAT-mediated high order chromatin structure enhances therapeutic efficacy through viral mimicry

**Poster 28**
Kyoung Ah Kang
3',4',5,7-Tetrahydroxyflavone induces apoptosis via antioxidant activity in human colon cancer cells

**Poster 29**
Jin Kang
Correlation between histone variant H3.3 and H2A.Z in their incorporations into the β-globin locus
Poster 30  Yujin Kang
Erythroid specific activator GATA-1-dependent interactions between CTCF-sites around the $\beta$-globin locus

Poster 31  Hyunkyung Kim
Histone demethylase functions as an essential factor for epigenetic control of autophagy

Poster 32  Kyeongkyu Kim
ROR$\alpha$ plays a crucial role in hepatic lipid homeostasis via negative regulation of PPAR$\alpha$ transcriptional network

Poster 33  Jueun Kim
The roles of histone deacetylase Rpd31 and Rpd32 in morphogenesis of candida albicans

Poster 34  Sunghyun Kim
The study of RNA epigenetics in IDH1 glioma heterozygous knock-in model by CRISPR single base editing

Poster 35  Min Jun Kim
Human papilloma viral proteins induced hyper-methylation in clusterin promoter region in cervical cancer

Poster 36  Myoung Jun Kim
Regulation strategy of overexpressed IL$\_X$R in ESCC

Poster 37  Hyo Min Kim
Epigenomic analysis of mouse intestinal organoid by integrating ATAC-seq and RNA seq

Poster 38  Mirang Kim
Sequencing-based analyses indicate a tumor-suppressive role of miR-1217, which is repressed by DNA hypermethylation in gastric

Poster 39  Dongha Kim
Roles of histone demethylase1 (HDM1) in inflammatory response

Poster 40  Dorota Konorska
The upstream regulation of TET1 protein

Poster 41  So Hee Kwon
Comparison between three heterochromatin protein 1 (HP1) homologs in drosophila

Poster 42  Andrew Lee
Identification of casual genetic elements of Parkinson’s disease through analysis of comprehensive long-range interaction map in human brain

Poster 43  Minkyung Lee
Mitosis-specific phosphorylation of kinetochore protein 25 by aurora B kinase enhances kinetochore recruitment of PLK1

Poster 44  Dominic Lee
Loss of CTCF disrupts cardiac chromatin organization and disease stress genes

Poster 45  Jong-Soo Lee
A novel function of CTCF in guarding genomic integrity
Poster 46  Seung Cho Lee  
LSH/DDM1- and 21-22 nt easiRNA-dependent pathways control retrotransposition in arabidopsis plants

Poster 47  Ho-Soo Lee  
Remodeling and spacing factor 1 (RSF1) is required for Sgo1 accumulation at mitotic centromeres through histone deacetylation

Poster 48  Anders Lindroth  
Histone H3.3 mutations in giant cell tumor of the bone reveal transcriptional processing connections

Poster 49  Tao Liu  
Eradication of neuroblastoma by suppressing the expression of a single long noncoding RNA

Poster 50  Valentina Migliori  
Investigating the role of Sra1 ncRNA pseudouridylation in vertebrate early development

Poster 51  Sunwoo Min  
Remodeling and spacing factor 1 (RSF1) promotes DSB-induced transcriptional silencing by recruiting polycomb transcriptional repressor at DSB sites

Poster 52  Ka-Lok Ng  
Direct DNA methylation mediated microRNA pathways in cancer

Poster 53  Jun-Soo Oh  
Rad6 links H2BUB1 with Swd2-mediated H3K4ME3 in saccharomyces cerevisiae

Poster 54  Jinwoo Park  
WHSC1 methylates AURKA and dysregulates P53 stability via induction of AURKA kinase activity

Poster 55  Shinae Park  
The regulation of the ubiquitination machinery for histone H2B ubiquitination

Poster 56  Chanhyeok Park/ Hyunjin Yoo  
Indispensable role for mouse ELP3 in embryonic stem cell maintenance and early development

Poster 57  Hyunsung Park  
Hypoxic reprogramming of histone methylations

Poster 58  Gloria Pascual  
Epigenetic control of CD36 + metastasis initiating cells by dietary fatty acids

Poster 59  Ki Eun Pyo  
Fine-tuning of both autophagy initiation and autophagosome maturation by ATG O-GlcNAc

Poster 60  Yeaseong Ryu  
Protective effect of flavonoid against oxidative stress via antioxidant properties

Poster 61  Andrea Schorn  
LTR-retrotransposon control by tRNA-derived small RNAs
Poster 62  Kyung-Ju Shin
Cancer-associated open chromatin loci detected in PBMCs via ATAC-seq

Poster 63  Hi-Jai Shin
AMPK-SKP2-CARM1 signaling cascade in epigenetic and transcriptional regulation of autophagy

Poster 64  Jinbae Son
Dysregulation of rRNA gene chromatin in ovarian cancer

Poster 65  Sugunakar Vuree
Cross talk between tumour microenvironment and epigenetic modifications of nutrient transporter regulatory genes, coupled with metabolic alterations in cells is a key for cancer cell progression

Poster 66  Justin Wong
DNA methylation regulates intron retention via altered MeCP2-mediated splicing factor recruitment

Poster 67  Oliver Worsley
Long lasting epigenome changes in a mouse model of physiological cardiac hypertrophy may prime genes for pathological expression in subsequent pressure overload

Poster 68  Pei-Ming Yang
Overexpression of miR-21 inhibits TET1 expression in human colorectal cancer

Poster 69  Soojin Yeom
The histone arginine residues are essential part of HM silencing maintenance in saccharomyces cerevisiae

Poster 70  Jungmin Yoon
Molecular architecture of histone chaperoning complexes

Poster 71  Jueng Soo You
Unexpected role of SWI/SNF complex in liver cancer

Poster 72  Young Suk Yu
RORα2 requires LSD1 to enhance tumor progression in breast cancer

Poster 73  Wei Zhang
Coupling of sister chromatid cohesion establishment to DNA replication in saccharomyces cerevisiae

Poster 74  Daniel Wing
Knockout validation of antibodies to cell cycle regulators

Poster 75  Daniel Wing
Immunology Antibody Validation: PTEN a target case in the use of human KO cell lines for antibody validation

Poster 76  Daniel Wing
Knockout validation of antibodies to Ki67: a marker for cellular proliferation

Poster 77  Daniel Wing
Validation of histone PTMs antibodies by peptide microarray
