Poster Index

Poster 1  Enara Arretxe (University of the Basque Country, Spain)
Putative involvement of NF-kB and STAT3 in the regulation of SND1 gene promoter activity

Poster 2  Sarah Bailey (University of Southampton, UK)
Tipping the balance between p53 and p73 expression influences chemoresistance in B-cell lymphoma with a possible role for interaction with STAT-1

Poster 3  Nicola Dryden (Imperial College London, UK)
The transcription factor Erg maintains endothelial cell homeostasis by repressing proinflammatory gene expression

Poster 4  Jekaterina Erenpreisa (Latvian Biomedical Research and Study Centre, Latvia)
Etoposide treatment induces oogenesis coupled to polyploidy in the ovarian teratocarcinoma PA1

Poster 5  Sylwia Kabacik (Health Protection Agency, UK)
A minimally invasive assay for individual assessment of the ATM/CHEK2/p53 pathway activity

Poster 6  Patricia Kohlhof (Klinikum Stuttgart, Germany)
NF-kappaB in mitochondria of human hepatoma cells is inducible by cytokine treatment

Poster 7  Samantha Larkin (University of Southampton, UK)
Proteomic profiling of prostate cancer progression

Poster 8  Christopher Macdonald (Newcastle University, UK)
Identification of synergistic transcriptional regulation for collagenase gene expression in chondrocytes

Poster 9  Aiste Monkeviciute (University of Glasgow, UK)
Left ventricular hypertrophy and dynamic microRNA profile in stroke-prone spontaneously hypertensive rat

Poster 10  Anurag Paranjape (Indian Institute of Science, India)
Transcriptional profiling of human breast cancer stem cells show involvement of genes regulating stemness, epithelial-mesenchymal transition and self-renewal in breast carcinogenesis

Poster 11  Nola Pickard (University of Southampton, UK)
Cardioprotection mediated through green tea: synthesis and biological evaluations of modified epicatechin and epicatechin-3-gallate analogues

Poster 12  Mauro Prato (University of Torino, Italy)
Haemozoin activates NF-kappaB and promotes transcription of pro-inflammatory and matrix-related molecules in human monocytes

Poster 13  Kristine Salmina (Latvian Biomedical Research and Study Centre, Latvia)
A self-renewal strategy of tumour cells through reversible polyploidy after genotoxic treatment

Poster 14  Abigail Savage (University of Liverpool, UK)
Polymorphic variation as a driver of differential gene expression correlated with disease

Poster 15  Ian Toma (George Washington University, US)
Mechanism of NFkB transcriptional divergence: from pro-survival to pro-apoptotic factor

Poster 16  Cristina Tufarelli (University of Nottingham, UK)
LINE-1 driven silencing of a metastasis suppressor gene in cancer
