

## Antibody and reagent identification program

# You know the targets, we know the antibodies. Let us do the searching for you

Searching for antibodies to multiple protein targets or other reagents for a large-scale project? We can provide you with product recommendations for your specific needs.

### The benefits of this program:

- We have over 118,000 antibodies in our catalogue. Now, you have the opportunity to design your experiment with our experts. They will select the most suitable antibodies for your research.
- Save time, samples and money. We will provide you with the best solutions available and suggested protocols.
- All our products are covered by the Abpromise guarantee.
